# Welcome note to ESMC2025

Dear Colleagues,

We are delighted to welcome all attendees of the 12th European Solid Mechanics Conference in Lyon, France, 7th - 1st July, 2025 (ESMC 2025). The conference is being held under the auspices of the European Mechanics Society (EUROMECH, <https://euromech.org>).

The European Solid Mechanics Conference is the major event for the solid mechanics community, and provides a unique forum for scientists and engineers from Europe and across the world to exchange ideas on the current state-of-the-art in the mechanics of solids, on new concepts and ideas and to identify new research directions.

Solid mechanics is the bedrock of engineering design in areas such as mechanical engineering, civil and structural engineering, and biomedical engineering. It is a critically important element in the design and development of almost all technologies and products in these areas, such as aircraft, automobiles, buildings, bridges, and medical implants and devices. Further, solid mechanics is a key enabler in the development of new technologies that address the major global challenges of our time in sustainability, renewable energy and health.

The first European Solid Mechanics Conference was held in Munich in 1991. This very successful conference initiated a tri-annual series with subsequent conferences held in Genova, Stockholm, Metz, Thessaloniki, Budapest, Lisbon, Graz, Madrid, Bologna, and Galway.

The 12th European Solid Mechanics Conference takes place at the Cité Internationale, in the city of Lyon, France.

We have assembled an outstanding group of invited plenary lecturers for the conference.

The conference is organised in terms of the following eight topics:

- Mechanics of Materials
- Biomechanics
- Continuum Mechanics
- Experimental Mechanics
- Computational Mechanics
- Dynamics, Waves, and Metamaterials
- Structural Mechanics
- Tribology

There are over fifty Mini-Symposia that cover a range of specialised areas, grouped under each topic.

We warmly welcome you to the wonderful city of Lyon for what promises to be a very exciting and stimulating event.

Yours sincerely,

Eric MAIRE
